

The diagram illustrates a frame structure bounded by dashed lines. It contains several rectangular blocks representing cells or data units. A central block, labeled 4, is flanked by blocks 2 and 6. To the right of block 4 is a large block labeled 3, which contains a sub-block labeled 5. Arrows indicate data flow: an arrow labeled 'P_last_cell' points to block 6, an arrow labeled 'P_end_of_frame' points to block 4, and an arrow labeled 'P_first_cell' points to block 5. Brackets and labels 1, 2, 3, and 6 group different sections of the frame. Ellipses (...) indicate that the structure can contain more than the shown blocks.
